

# SAFE LANE CAPABILITY STATEMENT

# About Safe Lane Consulting

Safe Lane Consulting Pty Ltd is a privately held consulting company specialising in Health, Safety and Environmental Consulting. We're dedicated to helping businesses across Australia in the construction industry achieve regulatory compliance and maintain safe work environments. Our tailored solutions meet the unique needs of each client, including compliance audits, on-going inspections, health and safety consulting and management, risk assessments, safety systems development and professional review services. Our goal is to provide training, support, and guidance to ensure that our clients have the necessary knowledge and tools to create and maintain a culture of safety.

As your trusted partner, we are committed to helping you protect your workers, minimise risks, and avoid costly penalties. Whether you're a builder, developer, or subcontractor we're here to provide you with the expertise and support you need to ensure compliance and safety on site. As part of our commitment to providing our services to businesses across Australia, we leverage digital technologies to enhance our availability and ensure that we can serve clients nationwide. Additionally, we have the capacity to travel to any capital city or regional town to offer our consulting services, no matter where your business is located.

We offer **tailored solutions** to construction businesses of all sizes from developers, builders, subcontractors, and suppliers, across multiple construction sectors including:

- 01 Domestic housing, including custom home construction
- 02 Medium rise buildings
- 03 Commercial buildings
- 04 Tall residential towers
- 05 Industrial including prefabrication & manufacturing
- 06 Mining construction & civil
- 07 Fit-out & refurbishment
- 08 Infrastructure

# Our Vision

To be the go-to construction health and safety consultants across Australia! We're a bunch of passionate building professionals who work closely with business owners, directors, senior management, and boots-on-the-ground workers. Our mission? More than just handing out documents - we're all about forming solid partnerships that foster a culture of ongoing support and education. Let's build safer sites together!

We are subject matter experts in our sector, with qualifications spread across **health and safety, project management, and much more.**

We take pride in offering expert guidance backed by years of experience. Led by our director, who serves as the principal consultant, we ensure personalised and consistent support, fostering strong client connections and unwavering dedication to our clients' requests.

- Incident investigation (ICAM)

## Who we're recognised by:

- Australian Institute of Building
- Australian Institute of Health and Safety

## Our team Becomes your team

We know that not every business can afford a full-time health and safety officer and that's where we come in. We're down-to-earth about keeping risks in check across the board. We get that safety might slip the mind when things get crazy, but remember, accidents can pop up in a heartbeat. Our laid-back yet effective approach, combined with our all-in-one skills in health, safety, and environment, acts like a safety net for managers, boards, and the higher-ups. We've got your back, ensuring everyone meets their responsibilities whilst improving the performance of the business. Our approach often sees us as part of the clients' teams, whether it's wearing the workers uniform or working autonomously in the background; we are completely invested in the success of our clients.

Our team works hand in hand with senior management and supervisors, giving them a breather allowing your business to focus on production whilst we focus on safety.

## Our Core Services

- Health, safety and environmental consulting, development, management, & review services

- Subcontractor safety management systems
- Policy and procedural development
- Toolbox talks discussions
- Internal training topics
- Risk assessments and internal training

## Our Risk-based Approach

At Safe Lane Consulting, we adopt a comprehensive and professional approach to health and safety, diverging from the conventional concept of 'Zero Harm' spun in the industry. We're all about keeping it real. So, when it comes to the whole 'zero harm' narrative in construction safety, here's our take: Striving for zero harm might sound good, but it can make things tougher for your business. What do we mean? Imagine achieving absolutely zero harm to workers? That's a tough nut to crack. What often happens is you end up with a workplace where people don't feel comfortable reporting on injuries, near misses and risks. You might see those low injury statistics, but it doesn't mean the risks are gone when reporting takes a backseat.

Our philosophy centres around a risk-based approach that emphasises a no-blame reporting culture and focuses on the reduction of high-potential serious risks. Our approach encourages workers to speak up about the site conditions making it known what areas need improving, which decreases the chances of serious risks from occurring. As a builder, developer, or subcontractor, you'll never be able to completely eliminate all risks from your sites, however you can choose to focus on which risks you're eliminating, and using our approach will focus on high-potential, serious risks.

Challenging industry norms is what sets us apart from our competitors and forms part of our commitment to our clients. We embrace new age thinking and continuously strive to innovate to provide you with the most effective solutions tailored to your specific needs. We do not believe in providing generic services. Instead, we promise to collaborate throughout the process until we have delivered services that exceed expectation.

## Reliable Partners For Lasting Support

At our core, we're all about **flexible and tailored** support services.

We know every client is unique, so we customise our agreements whilst maintaining our promise to affordable fixed price consulting services.

We start this process by having our clients map out their vision for what health and safety represents for their business. Once we have that in focus, we roll up our sleeves and construct a framework that brings that vision to life. However, we're not just here to set things up and walk away. We stick around, ensuring that the systems we put in place stay relevant, up-to-date, and get used effectively. If a problem arises, we can be available at the drop of a dime, 24/7, to provide our clients with the support needed to resolve the issue.

# Our Company Promise

## Policies

As health and safety professionals we have a responsibility to ensure that the work that we do does not expose officers, workers, contractors or others to any health, safety, or environmental risks because of the work we conduct. Our operations are conducted in accordance with our documented service agreement and internal corporate policies, ensuring that we continually improve on our offering. As a promise to our clients, we will:

- Exercise all due care, skill & attention in providing services.
- Comply with all relevant statutory obligations, regulations, & codes of practise.
- Meet or exceed our clients' expectations on time, & within budget as per the service agreement schedule.
- Establish a safe working environment by providing the appropriate information, instruction & training for our clients.
- Provide resources and support for workers who have sustained injury or illness in the line of duty in the form of a suitable return to work rehabilitation program.

## Peace of Mind you can Rely on

We take great pride in being a reliable partner for our clients. To ensure unparalleled peace of mind, we provide opportunities to raise any concerns about the services received. During this time, we actively encourage open communication and feedback to address any issues, so that they're promptly closed.

Our dedication to reliability is important in our organisation, and we consider this review period after completion of services, as an opportunity to demonstrate our commitment to our client's needs. We believe that by fostering a culture of reliability, we enable our clients to focus on their core business, knowing they have a partner they can rely on with confidence.

## Giving back to the Community

As a company, we have a strong belief in giving back to the community. We have had the opportunity to present awards and recognitions on behalf of the Australian Institute of Building, and regularly speak at industry networking events and universities. We are invested in the success of not only our clients' businesses, but to the wider construction and health and safety professional community. By working with us, you know you're engaging a consultancy with the credibility, knowledge, and professionalism to support your business, and a business that helps inspire the new generation of construction and health and safety professionals.

## Fixed Pricing Solutions

As part of our commitment to our clients, we offer fixed pricing to ensure that every time you choose to engage us, you have the peace of mind in knowing you're being treated fairly and will never be subjected to price gouging. We're transparent with our pricing and can negotiate packages to make the overall service offering more affordable. It's just one way we ensure that we maintain good on our promise to you to be the go-to construction health and safety consultants across Australia!
